

How does the NHS work and how is it changing?

Helen Hughes – NHSE London Regional Lead Diagnostics

helen.hughes50@nhs.net

The role of NHS England?

- To lead the NHS in England to deliver high quality services for all
- To set the national direction; allocate resources; ensure accountability; set the national approach to supporting and developing people; enable expert networks; give support to drive improvement; deliver services such as national procurement and digital services; and create the national approach to transformation
- To support local decision making, empowering local NHS leaders to make the best decisions for their local populations
- To set input from Integrated Care Systems (ICSs) to agree the mandate for the NHS with Government and to be accountable to parliament and Government for national NHS performance and transformation

Overview of NHS Funding Allocation

- NHS England is responsible for using or distributing more than £150 billion in funds
 - Ensuring **equal opportunity of access for equal need**
 - Having regard to the need to **reduce inequalities between patients** with respect to their ability to access services and with respect to the outcomes they achieve
- Some age groups require more healthcare than others
- People with long term illness may have greater need for health care
- A statistical formula is used to make the distribution of financial resources fair and objective
- This is the **'Weighted Capitation'** Formula, which produces a target allocation or 'fair share' for each area, based on a complex assessment of factors such as demography, morbidity, deprivation and the unavoidable cost of providing services in different areas
- The model output is allocations for core ICB commissioned services, specialised services and primary medical care services

NHSE Regions

Our regional footprints

NHS Diagnostics Past, Present & Future

NHS Diagnostics Past

National Strategy – Recovery and Renew 2020

- Professor Sir Mike Richards' independent review of NHS diagnostic services, published in October 2020 (hereafter referred to as the Richards' Review), set out the case for increasing diagnostic capacity in England.
- A key recommendation was for the rapid development and rollout of Community Diagnostic Centres (CDCs). These are designed to provide separate, dedicated locations for carrying out elective diagnostic tests, ideally away from acute hospital sites.
- The Richards review identified five key categories (or modalities) of diagnostics.

Diagnostic Programme journey to date...

- Over the five years prior to the COVID-19 pandemic, demand for almost all diagnostic services in England grew. The pandemic exacerbated pre-existing challenges, resulting in substantial increases to waiting times.
- Diagnostics form a key part of the health and care journey for many patients (over circa 90% of all clinical pathways).
- Diagnostics is recognised as a priority in the NHS Long Term Plan (LTP). Getting diagnostic provision right is a key enabler of several LTP commitments, specifically elective and cancer recovery and delivery of the NHS objectives set out in the [Operating Plan 2023](#).
- The government committed £2.3bn of investment over a 5-year programme to transform diagnostics, including rolling out Community Diagnostic Centres (CDCs) until March 2025.
- The diagnostic programme was launched in 2020/21 with committed funding over a 5 year period, specific focus on establishing with early adopter sites and year 1 CDCs.
- Ministerial focus in 2023/4 on the programme's delivery is increasing and will remain a priority for the remaining two financial years of the programme with a specific focus on:
 - Diagnostics supporting cancer recovery
 - Acceleration and embedding CDCs
 - Delivering Diagnostic Digital Capability plans for pathology and imaging, and go beyond where possible.
 - Increasing acute diagnostic capacity by continued and targeted capital investment
 - Increasing capacity in Pathology services, specifically histopathology in support of cancer recovery.
 - GP Direct Access.
 - Maximising utilisation of diagnostic capacity demonstrating return on national investment.

Diagnostics Recovery & Transformation 2023-24 Plan on a Page – overall summary

Measurable Outcome Targets by Mar 24

- Up to 160 CDCs approved and open
- 4.4m tests delivered in CDCs in 23/24 (8.5m since Jul 21)
- 90% CDCs at optimal utilisation & open 12hrs/7days
- 100% ICBs on trajectory for CT/MRI/US/Endo/Echo/BNW
- 100% ICBs delivering in excess of 100% Feb 23 activity
- 90% trusts meet optimal MRCT, NIOUS utilisation rates
- 222.7k imaging assets in service (353,000 FTE tests)
- 50% imaging networks reach 'maturing' status
- 70% trusts meet histopathology turnaround targets
- ICB networks on track for 10% DOG productivity gain
- All 2023 endoscopy assets in service (197,000 FTE jobs)
- 10% increase in JAG accredited endo units by Mar 25
- 3000 learners in education & training pipeline
- 2% growth in staff in identified roles (82)
- 325,000 extra GP Direct Access imaging tests delivered
- 75% Faster Diagnosis Standard for cancer met
- Diagnostic provision inequalities have narrowed vs 2020

Diagnostic Funding	23/24	24/25
CDG	13.24	24.95
CDG	13.24	24.95
Imaging & Mammography	8.7	8.7
Long Health Check	2.4	8.2
Imaging Equipment	26.5	26.1
Endoscopy	18.4	81.1
Pathology	117.2	122.9
CDG Revenue	691.9	959.9
Total Revenue	651.0	952.0

Key Initiatives:

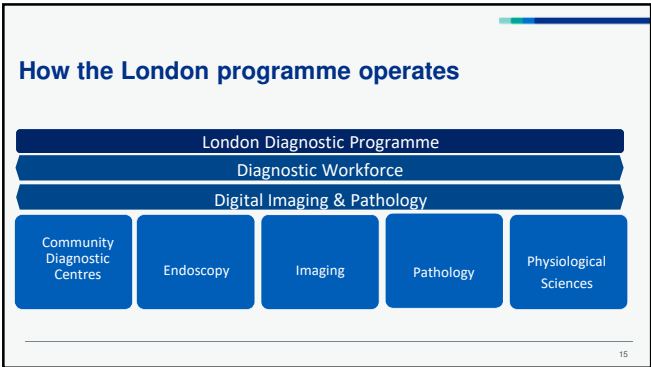

- Deliver CDCs to the trajectory set out in the Feb 2023 CDC Acceleration Plan
- All CDCs to be approved by end Q1, all CDCs meet activity targets, reach optimal utilisation/DNA rates by Q4
- Establishment CDC pathways that reduce time-to-diagnosis and optimise testing
- Deliver CDC acceleration plan action on approval, international recruitment, and procurement (design specification)
- Deliver all CDC related actions in the Apr 23 improving cancer performance ICB letter e.g. dermatologist roll out
- Ensure all imaging networks are maturing in line with the trajectory to achieve their target end state in 2024-25
- Ensure full spend of 23/24 acute capital budget, and that all equipment procured in 23/23 is in service by end Q1
- Ensure all ICBs deliver to agreed trajectories on BNW and reach/maintain optimal utilisation for CT, MRI and NIOUS
- Publish imaging turnaround time guidance and ensure that all trusts meet optimal turnaround times by end Q4
- Ensure all pathology networks are maturing in line with the trajectory to achieve their target end state in 2024-25
- Deliver national plan for histopathology performance improvement including through joint work with 19 providers
- Publish monthly histopathology turnaround time data and ensure all trusts meet optimal turnaround times by end Q4
- Deliver future pathology strategy and work with Genomics programme to ensure that plans are fully accommodated
- Work with sector to horizon scan for service disruption risks and swiftly mitigate issues when they arise
- Ensure full 23/24 spend on LIMS, digital pathology, PACS/RIS/Ordercomm, MRI software, iRefer, home reporting
- Ensure full delivery of benefits from 2021-23 investments, with training in place at system level
- Progress delivery of the national imaging registry, scope of national pathology registry & delivery digital strategy
- Ensure all ICBs deliver to agreed trajectories on BNW and reach/maintain optimal utilisation for endoscopy
- Ensure full spend of 23/24 acute capital budget, and that all equipment procured in 23/23 is in service by end Q1
- Ensure that ICBs fully deliver the endoscopy related actions in the Apr 23 improving cancer performance ICB letter
- Establish GI endoscopy networks throughout England
- Progress roll out of innovations to support improved performance e.g. new service models, Cobalt, AI tools etc.
- Ensure all ICBs deliver to agreed trajectories on BNW and reach/maintain optimal utilisation for echo and audiology
- Establish physiological science networks throughout England
- Progress roll out of innovations to support improved performance e.g. new service models, AI tools etc.
- Complete all national PS data checklists and ensure 100% trust participation in them
- Full delivery of expansion in medical and scientific training across identified roles
- Full delivery of programme to upskill existing staff across identified roles
- Full delivery of international recruitment, digital enablement and retention objectives
- March 23 workforce ignition event actions delivered by all Regions/ICBs
- Diagnostics performance improvement plan on track nationally and in each ICB. Focus on Diagnostics 2 delivered
- GP Direct Access Phase 1 fully delivered and Phase 2 launched successfully with early evidence of benefits delivery
- Diagnostics@Home and point of care testing work lead to roll out of at least 3 successful approaches by Mar 24
- Measurable reduction in unmet diagnostic demand in UIC, pathology and MRI
- Programme enable delivery on track: DM01 refresh, all benefits dashboards, pricing approach, Richards' refresh

NHS Diagnostics Future

16

New Government Manifesto

Fixing the NHS!

- Cut NHS waiting times with 40,000 more appointments a week by paying staff more to work weekends and evenings
- Two million more operations, scans and appointments in the first year
- Hit 18-week waiting time target by the end of the first term
- Expand the NHS workforce with thousands more medical training places to modernise hospital equipment to catch cancer and other conditions earlier
- Fit for future fund – to double the number of CT & MRI scanners allowing the NHS to catch cancer and other conditions earlier saving lives
- Committed to developing the new hospital programme
- Guarantee face-to-face GP appointments by training more GPs and modernise the appointment booking system to end the 8am scramble
- Provide 700,000 more NHS dentistry appointments a year and supervised tooth brushing for three- to five-year-olds
- Recruit 8,500 more mental health staff
- Specialist mental health support in every school
- Begin to create a National Care Service to set minimum standards for social care, and reach a collective agreement on pay and conditions for carers
- New 'neighbourhood health centres' with joined up services
