## **Statement on ACB support of unit harmonisation**

### **Section/Committee:**

ACB Scientific Committee and National Clinical Biochemistry Audit Committee

### **Author:**

Dr W S Wassif, National Clinical Biochemistry Audit Lead

### **Statement:**

The ACB recommends the litre as the primary unit of measurement of volume for expression of molar or mass concentration, and it should be used in preference to all other volumetric units of measurement (e.g. millilitres, decilitres etc.) wherever possible.
